1. General info

The main focus of this block is a periodical review of students within a teaching team. The basic idea of this module is that teachers do not always have time during the year to give verbalized feedback to the students but seek a simple way to do this periodically – for example at the end of each semester. Feedback with this module can be seen as an additional verbalized assessment-information that is given to students. Team assessments can easily be done, also between students.

Focusing on new pedagogical concepts establishing of a reflexive culture as part of education is an integral component. This module helps following this approach. Besides the verbalized feedback of students that allows the teaching team to give individualized feedback, each student can be assessed in different categories. Students may print their reviews at any time.

The basic idea of the module was to put a different organizational layer over Moodle-courses that allows a teaching-team, which might be different from a course-based-trainer structure to assess their students.

The configuration of students to classes for assessment can be done by any course-trainer.

After the basic configuration is done, any persons added to the assessment-team can assess students verbally. The course-teacher can print out the feedback for the whole class. In case that the exabis competencies block is installed students can also print out their competence-profile which includes verbalized feedback from exabis student review.

2. Installation

The exabis student review block can be downloaded as a zip-file. The zip-file contains a folder which has to be extracted to the blocks-directory of the Moodle-Installation.

The block has to be activated within a course. Only after the administrator of the Moodle-installation has configured an assessment-period – assessments can be made. Prior to that, a course-teacher has to configure the assessing-team and the students to be assessed verbally.

The block will only work with Moodle versions 2.x.

3. Roles for the block

There are some configurations that have to be made prior to using the block correctly.

3.1. Administrator

The administrator of the Moodle-installation has to configure assessment-periods. After the period is over, the assessments are archived automatically. Upon configuring a new assessment-period new assessments can be made by teachers.

Administrators can also upload a school-logo that will be included in the pdf-output that can be generated.

3.2. Course-Teacher

The course-teacher adds the reflecting team and the students to be assessed via the block-configuration. Any students and teachers can be added from the Moodle-user-pool.

4. The module

4.1. Configuring assessment-periods

Der Administrator kann für einen bestimmten Zeitraum eine Periode erfassen. Für diesen Zeitraum ist dann die Beurteilungsmöglichkeit für Lehrer/-innen aktiviert. Nach Ablauf der Periode werden die Daten automatisch archiviert – auf eine Periode kann im Nachhinein von Lehrer/-innen u. Schüler/-innen zugegriffen werden, eine Aktivierung der Periode kann nur durch den Administrator stattfinden.

Durch diese Systematik gehen keine Beurteilungsinformationen verloren – Beurteilungsperioden können je nach Anforderung bereitgestellt werden.

4.2. Adding assessors and assessed

Der Klassenvorstand kann über den Menüpunkt Konfiguration des Moduls die Lehrer/-innen aus dem Klassenteam sowohl als auch Schüler/-innen zubuchen. Dadurch wird es einfach, möglich Teambewertungen durchzuführen.

4.3. Assessment

Teachers can assess their students verbose (using the standard-moodle-editor) and on a scale from 1-10 with the soft-skills „teamplayer“, „responsibility“ and „self-reliance“ in the basic configuration. If exabis competencies is installed, more standards-categories are available for assessment.

4.4. Reporting

The course-teacher can generate a report for each student or in bulk. If the Moodle-block exabis competencies is installed, students can generate their

competence profile at any time. Different assessment-periods can be chosen for the report.
